OSA-0944-63

28 February 1963

## MEMORANDUM FOR THE RECORD

SUBJECT: Canine Program [REDACTED]

1. Colonel Ray Rife, Executive Officer, OSI, telephonically contacted me on 27 February 1963. He suggested that we might want to obtain a copy of Catalog #52 of the Brinkman Manufacturing and Fence Company, Route 8, Huntoon and Auburn Rd., Topeka, Kansas.

2. Colonel Rife indicated that the catalog describes a semi-portable kennel. Its utilization would involve the laying of a 5 x 8 concrete slab. He went on to point out that it would have a 4" curving and would provide for a short run area. He indicated that the kennel would be constructed of metal paneling and presumably have a chain link fence.

3. Colonel Rife stated that the Air Force intends to phase out the pedestal type of kennel currently being considered by [REDACTED] and recommend the utilization of the above-described kennel. He stated that the Air Force veterinarian people described the new kennel as much more satisfactory and affords the animal much more protection in the cold weather.
